Aries individuals are typically very **dynamic** and **energetic**. They know what they want in life and go relentlessly in that direction even if that means kicking down doors or doing something most people wouldn't try. For this reason, they are known as courageous **trailblazers** who lead the way for others to follow. Lastly, this makes them excellent **leaders** because they have a definite take charge personality that quickly gains the respect of those around them.

Most horoscope sign explanations paint a picture of **Taurus** as being incredibly stubborn and rigid. This can definitely be true at times, but the bigger truth here is that they're usually only this stubborn when they know in their hearts that they're doing the right thing. In the beginning stages of making a decision, they're usually quite open to all the options. In addition, they're so **patient** that they take their time to make sure they are taking the best course of action. Afterwards, yes, they can be very **stubborn** because they know that they've done their homework and nothing is going to budge them!

Gemini individuals are very curious about virtually every aspect of life. Their energy is very much like that of a **butterfly** because they tend to flit from one area of their life to another one and then another one, etc. This can make them incredibly **versatile** because they do tend to know something about everything. However, they do tend to scatter their energies too much and if they don't learn to focus better and their knowledge of certain subjects might not be very deep at all. Once they do focus, though, they make excellent students due to their enthusiasm for **learning**. This can definitely make them very solid **teachers** in the future if they learn to apply themselves.

Cancer is a very **home and family** oriented sign. Many horoscope sign explanations of Cancer portray them as being super sensitive and tender hearted. It is true that they can be **sensitive**, but this is due to their naturally emotional nature. They feel emotions much more vividly than most other signs and therefore feel the depth of all emotions very deeply whether it's a happy or sad emotion. This is actually a gift, though, because it enables them to deeply **empathize** with others and therefore they are often quite thoughtful of others. Since they really do understand what others are feeling, they can be quite loving and nurturing to others. This makes them excellent parents, counselors, and therapists because they really do care.

Most horoscope sign explanations describe **Leo** as the sign of royalty. Leo is, indeed, a very **confident** and **charismatic** sign. They are ruled by the Sun and this causes them to radiate outward the warmth and positive energy that they feel within the depths of their heart. They are usually very loyal and once they open their heart to you, they will always be there for you in any way they can. Their deep confidence in themselves enables them to achieve a level of mastery in their careers. Others around them usually find them to be a very **positive** and **inspirational** influence.

A lot of horoscope sign explanations portray **Virgo** as being very dry, analytical, and well....boring. Nothing could be further from the truth! Virgo's are actually fascinating people due to their broad base of **knowledge** about practically everything! Some Virgo's are like walking encyclopedias! Honestly, though, they truly do love to read, learn, and grow intellectually. They are typically always **striving to learn** more and, therefore, improve themselves and their performance in life. They have very high standards, are incredibly hard-working and **conscientious**, and always do their best to make the lives of those around them a little better.

Libras are usually known as the **peacemakers** and diplomats of the zodiac and this is for good reason. They are truly excellent at seeing things objectively and usually are great at helping others reach a favorable **compromise** for everyone. They are very sociable and usually excel in any profession that involves selling or promoting due to their considerable **charm** and **good looks** (Venus the ruler of Libra gives them beautiful features). Lastly, Libras thrive in relationships and are usually happiest when they can share their life experiences with those closest to them.

Horoscope sign explanations describe **Scorpios** as being very **intense** people who usually do nothing half-way. In fact, they have to be absolutely passionate about either something or someone or else they can't be bothered! They make very **loyal** friends and enemies. One of their big life lessons is learning to forgive those who they feel have wronged them. Once they master this lesson, they usually grow by leaps and bounds spiritually and become very powerful spiritual leaders for those around them. Scorpios have immense strength and can be absolutely fearless with facing challenging life situations that would make other signs run for the hills. In fact, once they really know what they want in life, nothing or nobody will stop them from obtaining it.

Sagittarius is a very positive, outgoing, and **adventurous** sign. Most Sagittarians love nothing more than to pack their bags and explore some new place that really pulls their chain. This can be locally, but usually Sagittarians love to travel far and wide. They're unusually **open-minded** and love to hear the thoughts and ideas of other cultures, religions, or belief systems. They are also very honest people so, like it or not, the truth is what you're going to get. Most people learn to really respect them due to this, however, because others feel that they always know where they stand with them. What you see is definitely what you get with a Sagittarian. There's no mystery involved here!

Capricorn is a very **intelligent** and structured zodiac sign that usually has great ambitions in life. They have no problem with hard-work and actually thrive on it! They pride themselves on how **productive** they are so the more they get accomplished in a single day the better! They are more than willing to pay their dues in order to reach the top of the mountain they're striving for. They are usually very disciplined individuals and usually make greater **leaders** because of this and because they have great organizational skills.

The typical horoscope sign explanations for **Aquarius** are that they are basically hard to figure out and maybe just a bit weird. In truth, they have a very **progressive energy** that is all about moving humanity forward in some way. They can be truly **visionary** and see things about life in ways that others just aren't able to see or understand. Due to this, this zodiac sign often has more than its fair share of **geniuses**. They have an inborn ability to see things with fresh eyes and come up with some truly unique and inventive solutions and/or inventions.

Horoscope sign explanations describe **Pisces** as being very **spiritual**. They have a deep **compassionate** love for those less fortunate than themselves. They also have a soft spot for animals especially stray animals. They usually find themselves striving to rescue others in some way and therefore are incredibly **giving** of themselves. Therefore, they must learn not to lose themselves in the process of trying to save others or else they will suffer great stress and depression until they learn this spiritual lesson. They usually take to spiritual concepts like a duck does to water! They are often happiest when they are practicing some form of spirituality that takes them beyond the typical 9 - 5 grind of the everyday world.
